Earphones

Quick Start Guide

Type-C Charging Cable

Ear Tips

## Instructions

---

### Charging

- Charging the earphones

When the earphones are placed in the charging case, they will automatically start charging.

- Charging the charging case

Use the Type-C charging cable to charge the charging case, or place it on a compatible wireless charger with the indicator of the charging case facing upwards. The indicator is red while charging, and turns green when the earphones and the charging case are fully charged.

The center of the wireless charger must be aligned with the center of the charging case in order to charge, which is about 15 mm right below the Xiaomi logo on the back of the charging case. The charging case's indicator will be lit while charging.

**Note:** Only use certified Qi-compatible chargers.

### Turning On

When opening the charging case, the earphones will automatically turn on.

## Sleep Mode

Place the earphones back into the charging case and close the lid, the earphones will disconnect and go into sleep mode automatically.

## Wearing

Take the earphones out of the charging case, and insert them into your ears according to the left (L) and right (R) marks.

**Note:** After using the earphones, place them back into the charging case. This will extend their lifespan and help you avoid losing or misplacing them.

## Connecting

---

### ● Connecting the earphones to a new device

1. Make sure that the earphones are placed in the charging case, and press and hold the function button for two seconds when the charging case's lid is opened. The indicator will start blinking white to indicate that the earphones are awaiting a connection. If the earphones are not connected for one minute, they will enter the sleep mode and the indicator will turn off.
2. Enable the device's Bluetooth, then search for and connect to the "Xiaomi Buds 3 Star Wars". If a passcode is requested, enter "0000".

**Note:** Before using the earphones for the first time, please place them into the charging case and press and hold the function button for five seconds to activate them. Once activated, the earphones will automatically enter the awaiting connection state.

- Clearing connection history

1. Place the earphones into the charging case.
2. Press and hold the charging case's function button for at least 10 seconds, and release it once the indicator stays white.

The earphones have been reset, and the connection history has been cleared. The charging case's indicator blinks white, and the earphones are in pairing mode again.

**Note:** Due to the connection characteristics of the Bluetooth signal, in dense environments with 2.4 GHz electromagnetic signal interferences, there may be occasional disconnects or no sound.

## Function Overview

---

### Incoming calls

Pinch the force sensor area on either side of the earphones: Answer/end a call

Double-pinch the force sensor area on either side of the earphones: Decline a call

### Music and voice assistant

While wearing both earphones:

Pinch the force sensor area: Play/pause

Double-pinch the force sensor area: Next track

Triple-pinch the force sensor area: Previous track

Press and hold the force sensor area for two seconds to cycle through: Enable noise cancellation >

Transparency mode > Disable noise cancellation

Take out either earphone: Pause music and wear the earphone back to resume playing

While wearing one earphone:

Pinch the force sensor area: Play/pause

### Notes:

- When only using one earphone, place the other into the charging case and close the lid.
- Noise cancellation mode cannot be set to on in single earphone mode.

## Specifications

---

Name: Wireless Earphones

Model: M2111E1

Earphone Input: 5 V $\overline{\text{---}}$ 0.08 A

Charging Case Input: 5 V $\overline{\text{---}}$ 0.5 A

Charging Case Output: 5 V $\overline{\text{---}}$ 0.2 A

Wireless Connectivity: **Bluetooth®** Low Energy 5.2

Supported Audio Codecs: SBC/AAC

Bluetooth Operation Frequency: 2402–2480 MHz (for EU)

Maximum Transmit Power for BT: <20 dBm (for EU)

Maximum Transmit Power for BLE: <13 dBm (for EU)

Wireless Charging Operating Frequency: 110-205 kHz

Operating Temperature: 0 °C to 45 °C

Storage Temperature: -20 °C to 45 °C

Storage Humidity: 5%–95% RH

The Qi logo is a registered trademark of the Wireless Power Consortium.

## WEEE Information

---

All products bearing this symbol are waste electrical and electronic equipment (WEEE as in directive 2012/19/EU) which should not be mixed with unsorted household waste. Instead, you should protect human health and the environment by handing over your waste equipment to a designated collection point for the recycling of waste electrical and electronic equipment, appointed by the government or local authorities. Correct disposal and recycling will help prevent potential negative consequences to the environment and human health. Please contact the installer or local authorities for more information about the location as well as terms and conditions of such collection points.

Hereby, Tiinlab declares that the radio equipment type M2111E1 is in compliance with Directive 2014/53/EU. The full text of the EU declaration of conformity is available at the following internet address:  
<http://www.mi.com/global/service/support/declaration.html>

Hereby, Tiinlab declares that the radio equipment type M2111E1 is in compliance with Radio Equipment Regulations 2017. The full text of the UKCA declaration of conformity is available at the following internet address: <https://www.mi.com/uk/service/support/declaration.html>

## Warning

---

- Do not expose the product to environments with a temperature that is too low or too high (below 0°C or above 45°C).
- Do not use this product during thunderstorms. Thunderstorms may cause the product to malfunction and increase the risk of electric shocks.
- Do not clean this product with alcohol or other volatile liquids.
- Avoid any contact with liquids.
- Do not use the earphones while driving, and comply with the relevant regulations in your region or country.
- Keep the product's indicator away from the eyes of children and animals while the product is in use.
- Do not disassemble, puncture or crush the product nor expose it to fire.
-  To prevent possible hearing loss, do not use this product at high volume for long periods of time.
- These earphones and their accessories may contain small parts. Please keep them out of the reach of children.
- Disposal of a battery into fire or a hot oven, or mechanically crushing or cutting of a battery, that can result in an explosion.
- Leaving a battery in an extremely high temperature surrounding environment that can result in an explosion or the leakage of flammable liquid or gas.
- A battery subjected to extremely low air pressure that may result in an explosion or the leakage of flammable liquid or gas.
- Product information and certification marks are located in the charging case.
-  The symbol indicates DC voltage.

- The product has a built-in battery that can not be removed or replaced. To avoid damage to the battery or the product, do not disassemble or modify the battery by yourself. The battery can only be replaced by the authorized service providers and must be replaced with the same type. Replacement of a battery with an incorrect type may defeat a safeguard (such as catching fire, explosion and leakage of corrosive electrolyte). Do not put the battery in trash that is disposed of in landfills. When disposing of the battery, comply with local laws or regulations.
- Stop using the product immediately if there is any swelling.

## CAUTION

There is a risk of explosion if the battery is replaced incorrectly.  
Only use and replace with the same or an equivalent type of battery.

This device is in compliance with Specific Absorption Rate (SAR) limits for general population/uncontrolled exposure  
Certification Information (Highest SAR)

SAR 10 g limit: 2.0 W/Kg

SAR Value: Head: 0.54 W/Kg (0 mm distance)

In some countries, the SAR limit is 1.6 watts per kilogram averaged over 1 gram of tissue for use against the head, body and 4.0

watts per kilogram averaged over 10 grams of tissue for use on the wrist. In other countries, the SAR limit is 2.0 watts per kilogram averaged over 10 grams of tissue for use against the head, body and 4.0 watts per kilogram averaged over 10 grams of tissue for use on the wrist.

Manufactured for: Xiaomi Communications Co., Ltd.

Manufactured by: Tiinlab Corporation

(a Mi Ecosystem company)

Address: No. 3333, Liuxian Avenue, Tower A, 35th Floor, Tanglang City, Nanshan District, Shenzhen, China
